

IUPUI Natatorium Renovation

220,000 Sq. Ft.

The Challenge:

- Renovations needed to stay on track in order for Sectionals
- Many departments being renovated needed to be staged to continue work
- Regular hours of the pool areas needed to stay open during renovations

"Relocation Strategies was a tremendous asset to me at the IU Natatorium. The building was highly cluttered and disorganized. They were able to quickly create a strategy for multiple moves and coordinate 5 different tenants and their shared storage spaces which took a large burden off of me. Their involvement in the project was invaluable and I will always have them on my mind for future work like this."

Doug Adams
Project Manager, Sheil Sexton Company

The Solution:

- Created a detailed phasing plan along with construction
- Coordinated with outside sources for staging purposes
- Proposed more efficient storage solutions

The Summary:

- Conducted storage programming with each department
- Reallocated space between departments based on discovered requirements.
- Coordinated and managed labor for relocations
