

NEVAEH Healthcare

11,000 Sq. Ft.

NEVAEH Healthcare Revenue Management wanted to remodel its East Chicago Health Center, but the building in need of updates sat hundreds of miles away from Nevaeh's home office in Chestnut Hill, Pennsylvania. Nevaeh enlisted the logistics services of Relocation Strategies to remodel its 11,000 sq. ft. healthcare facility.

Relocation Strategies developed a plan to divide the facility into four phases to prepare for the new wall and flooring finishes, selected by Lohr Design of Indianapolis. Relocation Strategies inventoried the furniture and awarded the implantation of the construction plan and move to Capitol Construction. All work done to remodel the entire facility was done after hours and over the course of four consecutive weekends. That way, none of the doctors, nurses, staff members or patients noticed any disruption in work or service. Twenty-two exam rooms and the workspace of 32 employees were renovated in the move.

"The move management of every detail was taken into consideration and we truly appreciate the services Relocation Strategies offered. We would recommend the services of Relocation Strategies to any facility going through a remodel to save time, money and most of all to stay operational."
