

# Bell Techlogix

## 153,000 Sq. Ft.

### The Challenge:

- Call Center could not have down time
- High technology needs
- Re-use existing workstations
- Re-use conference tables
- Bid new workstations

### The Solution:

- Established critical deadlines
- Phase moves for 200 people
- Developed detailed sequencing schedules
- Bid Data Cabling

*"Relocation Strategies is our "go-to" partner when moving offices and have been a great partner of ours. They have outstanding project management and planning methodologies which we appreciate and require. We took a portion of our existing cubes, that they inventoried and reconfigured and the rest was bid out and was purchased new. Wherever our needs are, Relocation Strategies was able to help us. One of our offices in Jackson, Mississippi needed to totally reconfigure and collapse 4 open floors into one usable space and Relocation Strategies allowed us to concentrate on the strategic decisions while they attacked the tactics of local vendors to accomplish our goals. Relocation Strategies saved our company a great deal of time, money and headache."*

Steven R Shannon  
Vice President Chief Information Officer, Bell Techlogix

### The Summary:

- Integration of existing and new furniture
- Minimized downtime, all moves after hours
- Re-finished conference tables

### Previous Projects:

Relocation Strategies has had a long-standing business relationship with Bell Industries. Bell has been a client for over twenty years, and in that time, Relocation Strategies has assisted Bell four times with various moves locally and nationally. Relocation Strategies assisted with the Information Technology (IT) unit of Bell, in Clinton, Mississippi on furniture inventory, cubicle installation drawings, furniture decommissioning and space reallocation for 40,000 square feet.
