

Gilchrist & Soames

274,000 Sq. Ft. (250,000 Warehouse & 24,000 Office)

The Challenge:

- Precise coordination of move phases with the production schedule
- Coordination of lab move with production and filling lines
- Warehouse move including over 7,000 skids and 3,000 critical skids

"In regard to our relocation to Plainfield, Relocation Strategies was a reliable partner providing our managers with concise move information, time schedules and support. They bid out components such as a new security system and movers to their trusted resources which helped us secure extremely competitive sources. The complexity of moving our offices, manufacturing, and warehouse facility was a major undertaking and having a good resource like Relocation Strategies made the task less daunting."

The Solution:

- Completed in 2 phases, spread apart to allow for production schedule
- Flexible on 2nd phase dates to allow Gilchrist time to keep production going
- Coordinated crews for lab tear-down, move and reinstall

Kathie De Voe
President/CEO, Gilchrist & Soames

The Summary:

- Phase 1 move April, phase 2 move July- non-critical skids moved in between phases
- Shipping and production lines had minimal delays during move
- Moved 3,000 skids over 1st weekend
- Bidding of security and move services
