

## Delaware County Justice Center: 134,166 Sq. Ft.

### Challenge:

BW Construction was hired to oversee construction management for the Delaware County Justice Center and needed a partner to design, specify and create a FFE RFP for public bid. Along with paving the way for Move Management process by conducting a walk through with several vendors and managing the Move RFP.

### Solution:

Relocation Strategies worked with the client to select furniture items that fit their design/budget and put out to bid. They also helped to secure the move vendor and create move instructions.

### Summary:

By hiring Relocation Strategies to manage the FFE portion and act as a lead through the move management process, BW was able to focus on the construction and client management. We were able to stay within budget and execute within the project timeframe.

"We engaged Relocation Strategies to be on our team to oversee the FFE design and procurement, as well as, provide a RFP for the relocation. They were a great part of our team and were a part of the projects' success. I would recommend them on future projects."

-Dustin Frye, BW Construction President
