

## RepuCare New Office: After

Approx. 4,000 Sq. Ft.

RepuCare has been growing and changing the way they work. Rather than moving to a new space they decided to stay where they are and reconfigure the space they already had to adapt to their needs. The plan was to reconfigure/remove the existing cubicles to make room for additional private offices needed. The reimagined space is beautiful and highly functional for RepuCare's needs.

Relocation Strategies provided the following services to RepuCare:

- Move Management
- Furniture Management

"Over the last few years, RepuCare has changed in the way we work and our office was no longer fit for our needs. Rather than moving to a new office space which would have been costly, Relocation Strategies helped us rethink our current space. Relocation Strategies provided detailed existing and install drawings and assisted with coordinating the moves of our existing and new furniture. We would recommend Relocation Strategies to anyone looking to rethink their current space, their expertise in furniture and move management was invaluable."

Billie Dragoo | Owner | RepuCare
